Map Distance & Area Help Guide

What do the buttons do?

Button	Where it's found	What it does
	Bottom toolbar, main screen	Starts up the drawing canvas so you can draw a path on the map. Use it to find distance or area.
	Bottom toolbar, main screen when a path is being edited	Removes and deletes from temporary memory the current path being drawn.
	Bottom toolbar, main screen	Adds a pin to the map near the center, where the little circle is. Add more than one pin to create a path for finding distance.
	Bottom toolbar, main screen	This is an undo button. It deletes the most recently added point from a path.
	Bottom toolbar, main screen	Toggles the map view between road map and satellite imagery.
	Bottom toolbar, main screen	Moves the map to the current location.
	Bottom toolbar, main screen	Opens up a menu that lets you choose between finding distance and finding area on the map.
	Top toolbar, main screen when a path is being edited	Stops editing of the path on the map. Exits the canvas mode. This lets you move the map around to get it where you want the map to be.
	Top toolbar, main screen when a path is on the map view	Resumes editing of a path on the map. This returns the app to canvas mode.
